

IMMUNOLOGY 2010™ BALTIMORE

97th Annual Meeting
THE American Association of
Immunologists
May 7-11, 2010 | Baltimore Convention Center

IMMUNOLOGY 2010™: Schedule of Poster Sessions

Saturday, May 8

- Cytokines I: Inflammatory Cytokines
- Cytokines and Inflammatory Responses
- Hematopoiesis and Immune System Development
- Host Defense: Innate Immune Mechanisms and Protective Immunity
- Host Defense to Microbial Pathogens
- Immune Response to Viral Infections
- Immunity to Bacterial, Parasitic, and Fungal Infections
- Immunology Education
- Inflammation and Host Defense
- Innate and Adaptive Immunity in Comparative Animal Species
- Lymphocyte/APC Migration Mechanisms
- Microbial and Viral Immunology
- Mucosal Immunity to Microbial Pathogens
- Mucosal Inflammation and Autoimmunity
- Regional Immunity
- Suppression and Regulatory T cells
- T Cell and NKT Cell Activation and Signaling
- Transcriptional and Post-transcriptional Regulation of Cytokine and Cytokine Receptor Expression
- Vaccines

Sunday, May 9

- Autoimmunity
- B Cell Signaling and Antibody Regulation
- CD4 T Cell Memory and TCR Repertoire
- Effector Cells of Allergic Disease
- Effector Processes and Control of Inflammatory Disease
- Epigenetic Regulation
- Host Defense: Innate Immune Cells and Protective Immunity

- Host Responses in the GI Tract
- Immune Regulation in Allergy
- Immunity to Influenza
- Innate Immune Response and Host Defense
- Initiation of Autoimmunity
- Mechanisms of Tumor Biology
- New Therapies for Autoimmunity
- Novel Therapeutic Approaches in Models of Allergy
- Regulation of Dendritic Cells, Monocytes, and Myeloid Suppressor Cells
- Tfh, Th9, and Th2 Differentiation
- Tumor Immune Escape
- Tumor Immune Response

Monday, May 10

- Antigen Processing and Presentation
- Cancer Immunotherapy
- CD8 T Cell Memory and Plasma Cell Responses
- Chemokines and Their Receptors in Health and Disease
- Cytokines II: Immunomodulatory Cytokines
- Effector Cells and Tissue Damage in Autoimmunity
- Host Defense: Innate Immune Receptors and Signal Transduction
- Immune Regulation of Host Immunity during Viral Infection
- Immune System Regulation
- iTreg, Th17, and CD4 CTL Differentiation
- Leukocyte Activation, Adhesion, and Recruitment
- Mechanisms of Disease in Experimental Models of Allergy
- Molecular Regulation in Inflammatory Diseases
- Regulation of Autoimmune Responses
- Technological Innovations in Immunology
- Transplantation Rejection and Tolerance

Poster Sessions are the most interactive part of the meeting!
Discuss data and research issues firsthand with authors. Posters will be displayed Saturday through Monday in the Baltimore Convention Center Exhibit Hall from 9:00 AM – 4:30 PM, with authors present from 12:30 – 1:30 PM.
